Drinking-Water System Number: Drinking-Water System Name:

**Drinking-Water System Owner:** 

**Drinking-Water System Operating Authority:** 

Drinking-Water System Category: Period being reported:

210000871

Elgin Area Primary Water Supply System

Elgin Area Primary Water Supply System Joint Board of Management

Ontario Clean Water Agency (OCWA)

Large Municipal Residential

January 1, 2017 through December 31, 2017

Complete if your Category is Large Municipal Residential or Small Municipal Residential

Does your Drinking-Water System serve more than 10,000 people? Yes [X] No [ ]

Is your annual report available to the public at no charge on a web site on the Internet?

Yes [X] No [ ]

Location where Summary Report required under O. Reg. 170/03 Schedule 22 will be available for inspection.

Lake Huron and Elgin Area Water Supply Systems c/o Regional Water Supply Division 235 North Centre Road, Suite 200 London, ON N5X 4E7 https://huronelginwater.ca/

Elgin Area Water Treatment Plant 43665 Dexter Line, Union, ON

Complete for all other Categories.

Number of Designated Facilities

served: N/A

Did you provide a copy of your annual report to all Designated Facilities you serve?

Yes [ ] No [ ]

Number of Interested Authorities you report to: N/A

Did you provide a copy of your annual report to all Interested Authorities you report to for each Designated Facility? Yes [ ] No [ ]

List all Drinking-Water Systems (if any), which receive all of their drinking water from your system:

Systems that receive their drinking water directly from the EAPWSS:

| Drinking Water System Name                    | Drinking Water System Number |
|---|------------------------------|
| City of London Distribution System            | 260004917                    |
| St. Thomas Area Secondary Water Supply System | 260078897                    |
| Aylmer Area Secondary Water Supply System     | 260004722                    |
| Port Burwell Secondary Water Supply System    | 260004735                    |
| Municipality of Central Elgin                 | 260004761                    |
| St. Thomas Distribution System                | 260002187                    |

Systems that receive their drinking water indirectly from the EAPWSS:

| Drinking Water System Name                          | Drinking Water System Number |
|---|------------------------------|
| Aylmer Distribution System                          | 260002136                    |
| Malahide Distribution System                        | 260004774                    |
| Dutton/Dunwich Distribution System                  | 220002967                    |
| Municipality of Bayham                              | 260004748                    |
| Southwold Distribution System                       | 210001362                    |
| Ontario Police College Distribution System          | 260002161                    |
| St. Thomas Psychiatric Hospital Distribution Supply | 260005255                    |

Did you provide a copy of your annual report to all Drinking-Water System owners that are connected to you and to whom you provide all of its drinking water?

Yes [X] No [ ]

Indicate how you notified system users that your annual report is available, and is free of charge.

### **Describe your Drinking-Water System**

The Elgin Area Primary Water Supply System employs pre-chlorination, screening, process pH adjustment (utilizing carbon dioxide), powder activated carbon addition (seasonally on an as-required basis), coagulation, flocculation, sedimentation, dual-media filtration, UV disinfection, post-chlorination, final pH adjustment (utilizing sodium hydroxide) and fluoridation to treat raw water obtained from Lake Erie. The WTP has a rated capacity of 91 ML/day (MLD). Water is pumped from the plant through two 750 mm and 900mm diameter water mains to various communities enroute to the Elgin-Middlesex terminal reservoirs located northeast of St. Thomas in the Municipality of Central Elgin. The drinking water system is monitored at various locations throughout the system via a Supervisory Control and Data Acquisition (SCADA) system.

A Residuals Management Facility (RMF) providing equalization, clarification, sludge thickening and dechlorination is also located on the main complex where thickened sludge is dewatered by centrifuges and sludge cake is sent to the landfill for final disposal. Clarified and dechlorinated liquid streams are sent back to Lake Erie through the plant drain.

### List all water treatment chemicals used over this reporting period

Carbon Dioxide

Aluminum Sulphate

Cationic Polymer

Powder Activated Carbon

Chlorine Gas

Hydrofluosilicic Acid

Sodium Hydroxide

Dewatering Polymer (Residuals Management Facility)

Sodium Bisulphite (Residuals Management Facility)

## Were any significant expenses incurred to?

- [X] Install required equipment
- [X] Repair required equipment
- [X] Replace required equipment

# Please provide a brief description and a breakdown of monetary expenses incurred:

### **Capital Projects:**

- Instrumentation replacements, turbidity analyzers
- Concrete crack injection
- Drain pipe replacements
- Installation of HVAC duct insulation in filter gallery
- Sluice gate shaft replacements
- Replaced backwash isolation valves
- Replaced discharge valves on low lift pumps #1 and #4
- Interior renovations and LED lighting upgrades
- Flow meter replacements

- Replaced 30" butterfly valve and 4" bypass valves at terminal reservoir inlet
- Implementation of online CT Calculator
- Clearwell and reservoir drainage improvements project
- Septic system replacement
- Low Lift 5 kV electrical upgrade project
- Removal of old communication antenna and wiring
- Installed storage and racking for spare pipe segments
- SCADA hardware and software upgrades
- Residuals Management Facility (RMF) scraper system repairs

### **Maintenance Projects:**

- Cell 1 level sensor replacement at terminal reservoir
- Replaced the section of service water pipe in the low lift building
- Replaced the low lift service water pressure reducing valve (PRV)
- Rebuilt the high lift 5 kV breaker
- Annual major preventive maintenance for UV units
- Annual major preventive maintenance for generators
- Annual major preventive maintenance for chlorinators
- Replaced low lift pH meter
- Installed new heating coil in the dehumidifier unit
- Replaced air relief valves on low lift pumps #1 & #4
- Installed new motor on north flash mixer
- Rebuild flash mixer
- Replaced valve actuator at Fruitridge surge facility
- Replaced flex couplings on chlorine solution lines and control valves
- Replaced low lift pumps #1 & #2 packing with mechanical seals
- Installed Uninterruptible Power Supply (UPS) unit for station 6 fluoride analyzer
- Installed actuator on valve in chamber #P039A
- Painted plant transformer
- Installed fall restraint anchor points on plant roofs
- Replaced administrative building hot water tank
- Electric heater units replaced in the reservoir valve house and low lift chlorine building

Provide details on the notices submitted in accordance with subsection 18(1) of the Safe Drinking-Water Act or section 16-4 of Schedule 16 of O.Reg.170/03 and reported to Spills Action Centre
