This letter is to address the issue with a pillar on the south corner of the house.

It is become apparent that the pillar is rotten and has become a structural issue also and in need of repair.

Due to where it is, the suggestion to be is after getting it structurally sound, to remove the pillar from underneath the balcony (8 ft) and have a carpenter repair and flute the pillar to the same specifications of the other pillar.

As it stands now June 15th 2016 the southside has dropped approximately 1 and 1 half inch and is rotten at the base, and to not incur anymore damage would like to have advisement as soon as possible.

Thank you for your time
