Lower Driveway Boulevard Parking Pilot Program Information Sheet

Minimum Geometric Requirements (Single Driveway)

Minimum Geometric Requirements (Shared Boulevard Driveway)

Guidelines:

- Vehicles must park parallel to the road facing the direction of traffic.
- Vehicles must not park on the grass portion of the boulevard or access the hard surface portion of the lower driveway by driving on the grass portion of the boulevard.
- All of the vehicle's tires must be on the hard surface portion of the lower driveway.
- No part of a vehicle is permitted to overhang onto the sidewalk or the roadway.
- 0.5 m of clearance must be maintained from the extension of the property line when parking on shared driveway aprons.
- Corner residential properties with a driveway located on a side street, are not eligible.
- Residential properties with driveways immediately adjacent to intersections, where parked vehicles may constitute a sight line obstruction, are not eligible.
