Other Types or Multiples			

Is there any additional information which may relate to the affordability of the proposed housing, or the type of housing needs served by the proposal?

☐ Yes ☒ No

If yes, please explain below:

APPENDIX E – RESIDENTIAL CONDOMINIUM CONVERSION

The following should be provided for applications involving the conversion of rental housing to Condominium tenure:

- A list containing the names and addresses of tenants in the rental property
- Rents in the property listed by unit number and type (ie, bachelor, one bedroom)
- Tenants in possession of the units notified of the application for a plan of condominium
- The number of rental units that tenants in possession of the units have indicated in writing they wish to purchase as condominium units
- Estimates of the selling prices for condominium units

Pursuant to Subsection 9(4) of the Condominium Act, 1998, the Approval Authority will require an applicant to have a person who holds a certificate of authorization within the meaning of the Professional Engineers Act or a certificate of practice within the meaning of the Architects Act or another qualified person, inspect the property and report to the Approval Authority. The report shall address the matters as set out below:

- A report prepared by an architect that provides a life safety audit of the building(s) to confirm that all life safety systems, such as fire separations, means of egress, exits, emergency, lighting, fire alarms, suppression systems, handrail guards, etc., are in place and functional to protect the occupants of the building. Further, the report is to address any building retrofit requirements under the Ontario Fire Code.
- A structural report prepared by a Professional Engineer to assess the structural adequacy of the building roof(s), balconies, parking structure, exterior veneer, windows, etc.
- A mechanical report prepared by a Professional Engineer to confirm that the building mechanical systems, such as HVAC, pumps, etc., are in good working order.
- An electrical report prepared by a Professional Engineer to confirm that the building electrical system(s) are in good working order.
- A site servicing report prepared by a Professional Engineer to document the condition of all site servicing, including any on-site underground services, stormwater management facilities, drainage and grading. The report must include a site plan and site servicing/grading/drainage plan that documents the locations and pertinent characteristics of each site feature.

Any deficiencies or works to be completed as noted in the above reports, in order that the building(s) and on-site services may comply with the applicable standards, will need to be rectified by the Property Owner prior to the registration of the condominium agreement. In this regards, the Declaration must include certificates by the above noted Architect and Professional Engineers to certify that all building components and site services comply with the applicable regulations and standards, and that all deficiencies and works to be completed, as documents, in their reports, have been remediated and completed.
